

FOLLOW THE FUNDS

LOOKING FOR FUNDING
TO ELECTRIFY YOUR FLEET?

Follow the Funds with us and explore the numerous incentive programs offered throughout California to help fleets adopt zero-emission vehicles and infrastructure. Join us for this webinar series to learn how you can take advantage of these opportunities and drive your fleet towards a more sustainable future!

Part I: Meet the Air Districts

May 15 | 10:00am-11:15am

Connect with three of California's air districts, South Coast AQMD, Bay Area AQMD, and Sacramento AQMD for updates on the status of their funding programs, upcoming incentive opportunities, past funding success stories, and more. CALSTART will then bring these funds to life with custom funding scenarios demonstrating how real-life applicants can apply these funds to their fleets and reduce overhead costs even further by combining them with other incentive programs, tax credits, LCFS credits, and 0% loans.

Part II: CALSTART Programs

June 12 | 10:00am - 11:15 am

Join us for funding status updates from four highly anticipated CALSTART-administered incentive programs: EnergiIZE, Communities in Charge, HVIP, and CORE. Engage with the program teams directly and learn more about how these funds can be applied to your specific infrastructure and vehicle projects. Following suit from the previous session, the CALSTART team will demonstrate custom funding scenarios showing the ways these funds can be stacked with external funding sources, in addition to tax credits, LCFS credits, and 0% loans.

Part III: Utilities Roundtable

July 10 | 10:00 am - 11:15 am

Join this roundtable discussion with Southern California Edison, San Diego Gas & Electric, and Pacific Gas & Electric, where you'll have the opportunity to engage each utility team directly and learn more about their available and upcoming funding and incentive programs. You will hear about electrification case studies, customer success stories, industry predictions, and other key utility-side announcements for the year ahead.

Part IV: The Future of Funding

August 7 | 10:00am-11:15am

Get a glimpse into the future of EVs, EV infrastructure, and the funds accelerating the adoption of these technologies with insights from experts at the California Air Resources Board, California Climate Investments, and the California Energy Commission. Each agency joins CALSTART to present their unique energization goals and funding priorities for the year ahead, with key insights into the evolving energization landscape and the resilient solutions driving innovation across the industry.
